February 2004

## **H & M International purchases Trinium-TMS to manage intermodal trucking operations**

H & M International, a leading intermodal trucking company based in New Jersey, has purchased **Trinium-TMS** to manage operations at its five trucking terminals. H & M International provides a network of intermodal trucking services across the U.S. Trinium Technologies is a logistics software developer providing integrated business solutions to trucking companies, 3PLs, public warehouse operators, and container freight stations.

H & M International implemented **Trinium-TMS** at its Carson, California terminal in late 2003 and will roll out the system to the company's other terminals in 2004. Trinium's integrated solution enables H & M to manage all customer service, operations, accounting, and administrative work processes in a real-time environment.

"Trinium provides a very impressive mix of technical expertise and industry experience. Their software is easy to use and flexible to meet the specific needs of our company and the growing needs of our customers", said Chuck Connors, president of H & M International.

**Trinium-TMS** also interfaces with H & M's corporate accounting system providing a seamless interface between terminal operations and corporate administration. Along with Trinium's TMS, H & M will implement Trinium's Document Imaging, EDI, Weblink, Event Management, and eModal Modules.

H & M expects to utilize **Trinium-TMS** to improve productivity of its internal staff and improve customer service levels.

### **About H & M International**

H & M International is a world-class provider of intermodal services whose history dates back more than a quarter of a century. Established as a trucking company in 1968, H & M has emerged as a leader in the industry. With more than 350 trucks nationwide, the company specializes in the movement of both domestic and international containers and trailers. [www.hmit.net](http://www.hmit.net)
