

PRESS RELEASE

Container Port Group Purchases Intermodal Trucking Solution from Trinium Technologies

PALOS VERDES, California – February 4, 2008 – Container Port Group (CPG), a leading provider of intermodal trucking services, based in Cleveland, Ohio, has purchased the Trinium application suite. CPG provides intermodal trucking services throughout the Midwest and Northeast at 13 terminal locations. Trinium Technologies specializes in developing systems that drive financial improvements for intermodal trucking companies.

After an extensive evaluation of several software vendors, CPG chose Trinium due to the company's intermodal domain expertise, focus on industry best practice, and the functional depth of the Trinium applications specific to intermodal trucking. "We feel that Trinium is the best long-term partner for intermodal trucking companies. Their focus on the issues facing intermodal trucking companies is unmatched in the industry", said Richard Coleman, president of CPG.

The purchase includes the core functionality of *Trinium-TMS* (transportation management system) for order management, dispatch, billing, driver settlements, and safety. *Trinium-TMS* will be interfaced with the company's corporate accounting system and document imaging system. CPG also purchased Trinium's EDI, Event Management, Weblink Modules and the Trinium-CFS system (container freight station).

The company plans to improve productivity, reduce costs, and improve overall customer satisfaction with the Trinium implementation. "Providing our customers with more timely and accurate information will be a key deliverable in implementing Trinium", said Russ Graef, senior vice president of CPG.

The CPG signing is another example of Trinium's primary focus in partnering with leading intermodal trucking companies. "We are very excited to have CPG as a customer. They are a forward thinking organization that will contribute greatly to our company and our applications. We look forward to a successful long-term partnership with the CPG", said Michael Thomas, CEO of Trinium Technologies.

About CPG – Container Port Group is a leading pioneer of the intermodal trucking industry. The company's fleet of over 600 drivers is focused on providing value-added services to its customers.
