Trinium Certifies Integration with PC*Miler 22

PALOS VERDES, California – February 26, 2009 – Trinium Technologies announced today that it has completed integration with PC*MILER's version 22. PC*MILER 22 is the latest version of the application developed by Trinium's partner ALK Technologies.

Trinium provides leading enterprise software for trucking companies of all sizes. The *Trinium-TMS* application is integrated with PC*MILER to calculate mileage for improved visibility at dispatch, auto-rating of customer rates on orders, auto-rating of driver settlements, and auto-rating of mileage-based fuel surcharge calculations. "Through our integration with PC*MILER, our customers are able to streamline their rating processes and provide better visibility to dispatchers during the planning process", said Michael Thomas, CEO of Trinium Technologies.

Trinium will still support customers using older version of PC*MILER but encourages companies to upgrade to the latest version, which is an annual release from ALK Technologies.

About Trinium Technologies - Trinium Technologies is a leading provider of enterprise systems for intermodal trucking companies. Its applications enable companies to reduce costs, grow revenue, and improve customer service. www.triniumtech.com.

About ALK Technologies - Since 1979, ALK Technologies has developed innovative mobile navigation and transportation technology solutions.
