ICI Trucking of Massachusetts Extends Investment in Trinium Applications

PALOS VERDES, California – January 27, 2009 – ICI Trucking, a division of Intransit Container, Inc. and a leading intermodal service provider in the North East, has extended its investment in the Trinium application suite. Intransit Container combined with ICI Trucking provides terminal operations and intermodal trucking services to and from Worcester, MA. Trinium Technologies specializes in developing systems that drive financial improvements for intermodal trucking companies.

After a successful implementation of *Trinium-TMS* in 2008, ICI decided to extend its investment in Trinium by adding Trinium's EDI and Document Imaging Modules. The EDI Module will enable ICI to connect to its customers for order receipt, status updates, and invoice processing. Implementing the Document Imaging Module will enable ICI to streamline its operations and improve service to its customers. As important as the process improvement and cost savings, the Trinium system will provide ICI's customers complete visibility of their containers while in ICI's control.

"With in 6 months of implementing Trinium, we were able to achieve a return on investment by improved efficiencies with in our operation. We expect to receive additional ROI in implementing their EDI and Document Imaging Modules", said Steve Jones vice president ICI Trucking.

"The incremental implementation of Trinium at ICI Trucking is a good example of how companies can deploy the right system in a controlled environment to achieve desired business goals. From the start of our project with ICI it was apparent that this was a strategic initiative for the company. It is always good to see results being achieved in a short period of time", said Dennis Lane, vice president of sales and marketing of Trinium Technologies.

About Intransit Container (ICI) - ICI is New England's leading "double-stack" terminal operator and intermodal service provider offering double-stack rail service between Worcester, MA and the West Coast along with the Port of NY&NJ. In addition to terminal and trucking services, Intransit Container offers a comprehensive list of transportation services including warehousing, a chassis pool, foreign trade zone (FTZ), maintenance and secure trailer/container storage.
