

PRESS RELEASE

Trinium Technologies Releases New and Improved Website

PALOS VERDES, California – March 8, 2010– Trinium Technologies, a leading intermodal and multimodal trucking software provider based in Palos Verdes, CA, has released a new and improved website to better serve its customers. “With 2010 looking to be a very successful year, we wanted to give our web site a fresh look. This site will serve as the ideal e-commerce platform to develop our web offerings for the future and to enable improved interaction with our customer base,” said Michael Thomas, CEO at Trinium Technologies.

Visitors can view new and improved content on our product and industry. Current customers can view and retrieve information on industry best practice, case studies, updated training materials, workflow diagrams, version release notes, user conference materials, and general information on the solutions offered by Trinium. In the future the website will even serve as the portal for the company’s next generation web applications.

The site is very easy to navigate and is full of useful information. It also provides a link to the company’s Facebook and Twitter accounts which are updated weekly on current industry and product news. It is a great resource for trucking companies to catch up on current industry issues and how our technology can assist in improving their bottom lines.

About Trinium Technologies - Trinium Technologies is a leading provider of enterprise systems for intermodal and multimodal trucking companies. Its applications enable companies to reduce costs, grow revenue, and improve customer service. www.triniumtech.com.
