Clean Truck Operator, Pacific 9 Transportation Implements Trinium

PALOS VERDES, California – September 15, 2009 – Pacific 9 Transportation, a clean truck and SmartWay certified drayage carrier based in Long Beach, California, has implemented Trinium’s application suite. Pacific 9 Transportation provides intermodal drayage and over the road trucking services in Southern California, Dallas, Texas and Houston, Texas. Trinium Technologies specializes in developing systems that drive financial improvements for multi-modal trucking companies.

Meeting the growing needs of its customer base was the main motivation for the system upgrade. “Trinium has enabled us to improve our service levels and to meet the demands from our customers for timely and accurate data. We can now provide our customers will visibility to their data via EDI, automated emails, and the Web”, said Chris Hong, president at Pacific 9 Transportation.

Pacific 9 evaluated many vendors before deciding on Trinium. The desired application needed functionality to manage the clean truck initiatives in Long Beach/Los Angeles Ports, to manage intermodal drayage operations as well as truckload operations, and needed to be scalable to meet the company’s growth plans. “We are always encouraged when our focused product development results in signing new quality operators. The clean truck functionality we’ve added was specifically designed for companies like Pacific 9”, said Michael Thomas, CEO at Trinium Technologies.

About Pacific 9 Transportation – Pacific 9 was formed in 2004 with a simple goal to establish a company that would provide exceptional customer services, exceed customer’s performance standards, and maintain the commitment to a family business environment. www.pac9.com

About Trinium Technologies - Trinium Technologies is a leading provider of enterprise systems for intermodal trucking companies. Its applications enable companies to reduce costs, grow revenue, and improve customer service. www.triniumtech.com.
